Acknowledgements	:	Ministries of Health and Family Welfare Medical Colleges

DISCLAIMER

All efforts have been made to verify and collate information about medical colleges in India included in the Directory. Information has been collected from various sources, namely directories, newsletters, Internet, telephonic verification, letter heads, etc.

However, NIPCCD does not take any responsibility for any error that may inadvertently have crept in.

The telephone numbers, e-mail IDs, focus areas of research, etc. change from time to time, hence NIPCCD may not be held liable for any incorrect information included in the Directory.

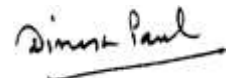

Foreword

Medical colleges, besides their vital task of medical education, play a very important role in buttressing the health services of people and maintaining the health status of citizens. Health has ranked high on the priority list of Government programmes since Independence, and in collaboration with Medical colleges and voluntary organisations efforts have been made to deal with health and social problems that exist at the community level. Government has set up network of primary and community health centres that work in close collaboration with interns from medical colleges to reach out to persons in rural areas through outreach services. Medical colleges have thus undertaken pioneering work in many areas, assisted non-governmental organisations in dealing with newly emerging social problems, provided training to functionaries at various levels, and evaluated the outcomes of many Government programmes for the underprivileged.

A Project was undertaken by Documentation Centre for Women and Children (DCWC), NIPCCD to bring out Directories of Organisations working in many areas. This document covers the medical colleges all over the country. Each Directory has been arranged state-wise alphabetically, and provides latest information for the convenience of users.

It has been possible to bring out this document due to the extensive cooperation extended by various medical colleges that have shared the relevant information with us. Without their support it would not have been possible to bring out this compilation.

It is hoped that this document would be useful for all stakeholders working towards improving the health status of vulnerable sections of society.

(Dinesh Paul)
