## **DISCLAIMER**

All efforts have been made to verify and collate information about department of pediatrics of medical colleges included in the Directory. Information has been collected from various sources, namely directories, newsletters, Internet, telephonic verification, letter heads, etc.

However, NIPCCD does not take any responsibility for any error that may inadvertently have crept in.

The telephone numbers, e-mail IDs, focus areas of research, etc. change from time to time, hence NIPCCD may not be held liable for any incorrect information included in the Directory.

## Introduction

Medical colleges play a very important role in maintaining the health status of citizens. Health has ranked high on the priority list of Government programmes since Independence, and in collaboration with Medical colleges and voluntary organizations efforts have been made to deal with health and social problems that exist at the community level. Government has set up primary and community health centres that work in collaboration with interns from medical colleges to reach out to persons in rural areas through outreach services. Medical colleges have undertaken pioneering work in many areas, assisted NGOs in dealing with newly emerging social problems, provided training to functionaries at various levels, and evaluated the outcomes of many Government programmes for the under privileged.

A Project was undertaken by Documentation Centre for Women and Children (DCWC), NIPCCD to bring out Directories of Organizations working in many areas. This document covers the pediatrics departments of various medical colleges all over the country. For the convenience of users, departments in the Directory have been arranged state-wise alphabetically

This Directory gives detailed information about the departments and their activities, including postal address, telephone, fax, website, e-mail address, and key words indicating their areas of work and activities.

It has been possible to bring out this document due to the extensive cooperation extended by various medical colleges that have shared the relevant information with us. Without their support it would not have been possible to bring out this compilation.

It is hoped that this document would be useful to all stakeholders working for improving the health status of vulnerable sections of society.
