

ENSURING CHILD HEALTH & NUTRITION- AN AWW'S ROLE

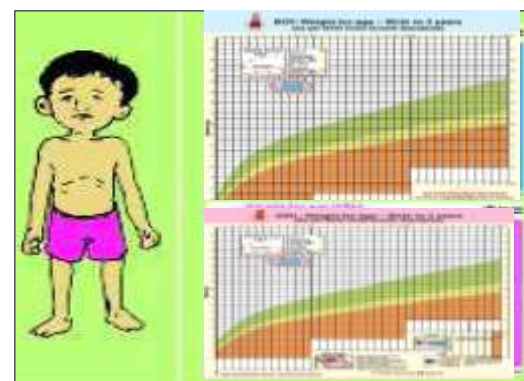

Communicate essential messages on prevention of malnutrition

Advise families on infant and young child feeding practices and access to health and nutrition services

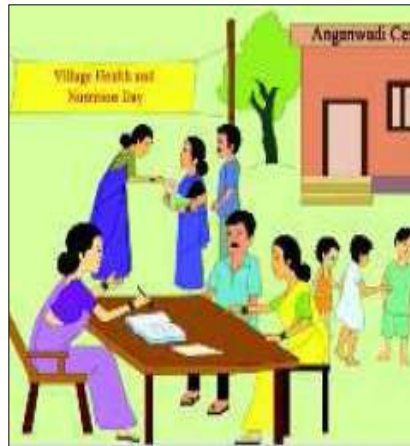

Conduct home visits and provide home based counselling for prevention of malnutrition and reversal of undernutrition in children below five years

Assess children for malnutrition; determine the grades of malnutrition, including referral in severe cases

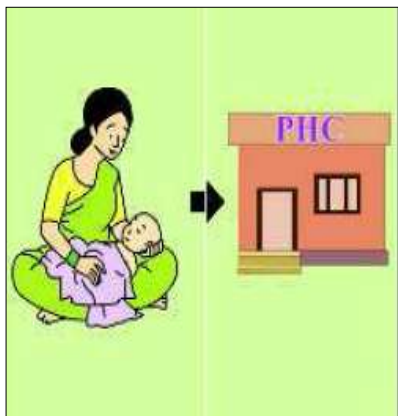

Track all eligible children for immunization & ensure complete immunization coverage

Celebrate monthly VHND & ECCE days and discuss thematic issues

Mobilize families for VHND, & pay special attention to ensure that poor & marginalized are able to access the required services

Asses danger signs in children and ensures prompt referral

Diagnose diarrhoea, counsel family on prevention, on use of ORS & referral in severe cases

Diagnose & refer cases of acute respiratory infections and ensure care of LBW babies

Ensure all the families have access to MCP card
